

Hey guys,

I'm Johanna and I'm going to tell you something about the American boarding schools. Maybe you also have an opinion about it?

Boarding schools are usually private schools and the students there are really in the focus of the school. The schools try to improve talents and not breaking down weaknesses. The word „boarding“ means lodging and meal so it's an allrounded package.

Did you know that boarding schools were usually founded because they wanted to teach the Native American the European culture? I was really surprised when I read that. I thought it's only for the rich people, you know? But it isn't!

The money plays still a big role there but you have possibilities! There are scholarships or other ways to go to a boarding school if you really want that.

But let's come to the nice things about boarding schools. Boarding schools take much of money but they spend some of it in their expensive equipment and also in their accommodation. They're modern and you have all what you want.

But there are also the teachers and other students. Every teacher is an expert in his area and there are so many students from different nations with different cultures!

I think it's a really big experience!!

I could tell you much more! About educations, campus and so on but I will tell you the next time.

I hope you enjoyed!

See you soon.

Johanna Vieth
